Hiring Team, Finance

Crown Lift Trucks Canada

Dear Hiring Team,

I'm applying for the Finance Accounting Intern position for Summer 2026. I'm a second-year Bachelor of Commerce student at the University of Guelph, concentrating in Management, Economics, and Finance, and I'm looking for a summer where I can apply my coursework in financial accounting and Excel-based analysis to the day-to-day rhythm of a finance team: reconciliations, AP/AR, month-end working papers, and reporting cycles. The scope of this role lines up directly with where I want to spend the next four months.

Last summer, as Office Administrator at a small car-wash business in Ottawa, I handled work that overlaps with this role. I maintained an Excel and Google Sheets workbook tracking daily, weekly, and month-to-date revenue across service lines, using pivot tables, SUMIFS, and VLOOKUP to produce a weekly summary for the owner. I reconciled point-of-sale transactions against the appointment book and supplier invoices, flagging variances such as voided tickets, unbilled add-ons, and double charges so they could be corrected before month-end. I also compared each week's revenue to a 4-week baseline and reviewed the drivers behind any gaps with ownership.

I'm comfortable working independently on data-entry and reconciliation tasks, careful with confidential information, and used to asking questions when something doesn't tie. I'd be glad to support your team's AP/AR and reporting work over the summer.

I'm based in Mississauga and able to commute to any of the Ontario branches. Thank you for considering my application. I'd welcome the opportunity to speak further.

Sincerely,

Bassam Ahmed
