

Husam Ahmed

Operations & Compliance • Federal Government Experience • Active Reliability Status

Ottawa, ON · husamdaifalla01@gmail.com · (647) 685-6908

PROFESSIONAL SUMMARY

Federal operations professional at IRCC's Operations Support Centre. I process identity and case-integrity work under IRPA at a national intake: GCMS casework, biometric operations support for 60+ Visa Application Centres and Missions, and controlled information-sharing decisions. Concurrently, I write briefing notes and author SOPs in a regulatory research role. Active Reliability Status. Substantive CR-04, acting PM-01. Currently completing the Google Data Analytics Professional Certificate (Coursera).

CORE SKILLS

Operations · Case Management, Case Triage, Data Integrity, Identity Verification, Entity Resolution, Records Management, Quality Assurance, Audit Readiness

Compliance & Policy · IRPA, Privacy Act, IRCC Legislation, Information-Sharing Controls, Breach Handling, Privacy Compliance

Documentation · Briefing Notes, SOP Development, Compliance Checklists, Change Logs, Technical Writing, Procedure Authoring

Tools · GCMS, Microsoft Excel (pivot tables, lookups, formulas), Power BI, SharePoint, Microsoft Teams

PROFESSIONAL EXPERIENCE

Program Assistant / Acting Case Processing Agent (CR-04, acting PM-01)

Aug 2024 to Present

[Immigration, Refugees and Citizenship Canada, Operations Support Centre](#) / Ottawa, ON *(Held concurrently with the Stelis role below.)*

- Resolve probabilistic identity matches in IRCC's Global Case Management System (GCMS) by cross-referencing biographic, biometric, and travel-document evidence across two or more associated client records, including multi-record household cases, then commit master-record corrections (UCI merges, biometric associations and disassociations, profile relinking) to restore case integrity for federal applicants.
- Perform in-depth identity analysis on client files, examining passports and travel documents directly and drawing on close familiarity with the fraudulent tactics applicants use to try to defeat identity controls.
- Apply the Immigration and Refugee Protection Act (IRPA) and controlled information-sharing protocols when handling flagged breaches, determining what client information can be shared, with whom, and under what authority, while coordinating corrective action with internal teams and overseas missions.
- Triage the central Data Integrity unit's national intake of status checks and household identity-correction requests routed from offices across the federal department, supporting both PPMI and IMM applicants, prioritizing against case urgency and team capacity.
- Confirm citizenship status by reviewing naturalization records, certificate issuance, and grant or revocation history in IRCC systems, returning verified status with supporting documentation cited for downstream officers and partner program requests.

Water Quality Researcher, Quality Systems (Regulatory & Data Analysis)

Nov 2023 to Present

[Stelis Environmental Solutions](#) / Ottawa, ON *(Concurrent with the IRCC role above.)*

- Write the briefing notes and comparison tables that go to senior management, laying out speed, verification, documentation, and regulatory-acceptance tradeoffs between real-time and lab-based monitoring.
- Author and maintain the team's consolidated SOP and compliance checklist on federal and provincial drinking-water rules (Health Canada GCDWQ, Ontario O. Reg. 169/03 and 170/03), used as the primary reference for assessing real-time outputs against lab-based requirements.
- Track regulatory changes to drinking-water rules in a running change log, update the SOP and compliance checklist as rules evolve, and surface compliance risks to project leads.
- Combine and clean public drinking-water and wastewater monitoring data from Health Canada, the US EPA, and provincial reports, standardizing inconsistent reporting formats, then build cross-jurisdictional Power BI dashboards, including exceedance heat maps, that drive the team's market prioritization.
- Compare real-time ColiMinder readings against culture-based lab results in Excel pivot tables, calculating percent agreement and false-positive rates across pilot sites to quantify how closely the real-time method tracks the lab benchmark.

Manager on Duty / Sales Advisor

May 2021 to Aug 2024

[Rogers Communications](#) / Ottawa, ON

- Ran the store floor as Manager on Duty, owning opening and closing procedures, cash and inventory controls, and daily targets, and serving as the escalation point for both staff and customers across the shift.
- Acted as on-floor compliance authority for credit, KYC, and privacy decisions, reviewing customer documentation and credit-check results and approving transactions only when every regulatory and internal-policy step was met.

- Onboarded and trained new hires on KYC procedures, privacy requirements, and documentation standards, maintaining consistent compliance across shifts; led a team of three over three years.
- Drove client retention above 90% and high CSAT by analyzing CRM customer history in Excel and building structured follow-up workflows that produced an auditable record of each customer interaction.

Market Research Interviewer

Jan 2021 to May 2021

[Elemental Data Collection](#) / Ottawa, ON

- Conducted structured interviews against research protocols and polling scripts, capturing responses accurately to support clean downstream datasets and consistent reporting across projects.
- Improved sample quality by converting 30 to 40% of initial refusals, raising response rates and strengthening the representativeness of project data.
- Maintained accurate records of response outcomes, call attempts, and interview dispositions to support supervisor and analyst review and reliable downstream reporting.

EDUCATION

Bachelor of Science, Biology

Sep 2020 to Dec 2024

[University of Ottawa / Ottawa, ON](#)

- Structured data collection and documentation in microbiology coursework (sample handling, protocol adherence, results logging).
- Quantitative and statistical analysis of laboratory datasets in Excel; technical lab reports summarizing methods, results, and limitations.
