

Husam Ahmed

Operations, Compliance & Data Integrity • Federal Government Experience • Active Reliability Status

Ottawa, ON · husamdaifalla01@gmail.com · (647) 685-6908 · linkedin.com/in/husamahmedca

PROFESSIONAL SUMMARY

Operations and compliance professional with federal government experience and an active Reliability Status. At IRCC's Operations Support Centre I resolve identity and data-integrity cases in GCMS, apply the IRPA and Privacy Act, examine documents for fraud, and administer CIBIDS and myKEY access for staff worldwide. My background also includes regulatory research with Power BI reporting, and three years as a Manager on Duty at a Rogers store, handling cash and inventory, customer credit and KYC checks, and supervising and training staff. Strong in case management, document and records management (GCDocs), data analysis, and confidentiality. Seeking analyst, officer, coordinator, or administrator roles in the National Capital Region.

CORE SKILLS

Operations · Case Management, Data Integrity, Identity Verification, Document & Passport Examination, Fraud Detection, Case Triage, Quality Assurance, Records Management

Compliance & Policy · IRPA, Privacy Act, KYC, Information-Sharing Controls, Breach Handling, Confidentiality

Documentation & Data · GCMS, GCDocs, SharePoint, Microsoft Excel, Power BI, SOPs, Briefing Notes, Regulatory Research

Service & Team · Client Service, Team Training & Supervision, Coordination & Scheduling, Cash Handling, Procurement & Receiving

PROFESSIONAL EXPERIENCE

Program Assistant / Acting Case Processing Agent (CR-04, acting PM-01)

Aug 2024 to Present

Immigration, Refugees and Citizenship Canada, Operations Support Centre / Ottawa, ON (Held concurrently with the Stelis role below from Aug 2024 to Jul 2025.)

- Resolve probabilistic identity matches in IRCC's Global Case Management System (GCMS) by cross-referencing biographic, biometric, and travel-document evidence across two or more associated client records, including multi-record household cases, then commit master-record corrections (UCI merges, biometric associations and disassociations, profile relinking) to restore case integrity for federal applicants.
- Perform in-depth identity analysis on client files, examining passports and travel documents directly and drawing on close familiarity with the fraudulent tactics applicants use to try to defeat identity controls.
- Apply the Immigration and Refugee Protection Act (IRPA) and controlled information-sharing protocols when handling flagged breaches, determining what client information can be shared, with whom, and under what authority, while coordinating corrective action with internal teams and overseas missions.
- Triage the central Data Integrity unit's national intake of status checks and household identity-correction requests routed from offices across the federal department, supporting both PPMI and IMM applicants, prioritizing against case urgency and team capacity.
- Run pivot analyses in Excel and reporting queries in GCMS across large case datasets to confirm application statuses, surface anomalies, and flag potential information-sharing breaches for controlled handling.
- Provide biometric operations support through the Biometrics Operations Support Unit (BOSU): administer CIBIDS and myKEY access for staff at 60+ Visa Application Centres and Missions abroad and for IRCC partners, handling account provisioning, permission changes, and urgent technical issues across time zones, with each action logged.

Water Quality Researcher

Nov 2023 to Jul 2025

Stelis Environmental Solutions / Ottawa, ON (Held concurrently with the IRCC role above (Aug 2024 to Jul 2025).)

- Built cross-jurisdictional Power BI dashboards and exceedance heat maps from multi-source public data (Health Canada, US EPA, and provincial reports), cleaning and standardizing inconsistent formats so jurisdictions could be compared for the team's market prioritization.
- Validated a real-time microbial water-testing method against culture-based lab results in Excel, calculating percent agreement and false-positive rates across pilot sites to measure how closely it tracked the lab benchmark.
- Authored and maintained the team's main SOP and compliance checklist on federal and provincial drinking-water rules (Health Canada GCDWQ, Ontario O. Reg. 169/03 and 170/03).
- Wrote the briefing notes and reports for the company's leadership on the tradeoffs between real-time and lab-based monitoring: speed, verification, documentation, and regulatory acceptance.
- Tracked regulatory changes in a running change log, updated the SOP and checklist as rules evolved, and flagged compliance risks to project leads.

Manager on Duty / Sales Advisor

May 2021 to Aug 2024

Rogers Communications / Ottawa, ON

- Performed daily cash audits and managed the store's cash-in-hand (BPO credit), reconciling balances and working within a set monthly budget; put together retention offers and outreach within that budget.
- Procured and received product inventory and managed stock levels in a fast-paced retail environment.
- Acted as on-floor compliance authority for credit, KYC, and privacy decisions, reviewing customer documentation and credit-check results and approving transactions only when every regulatory and internal-policy step was met.
- Onboarded and trained new hires on KYC procedures, privacy requirements, and documentation standards, maintaining consistent compliance across shifts; led a team of three over three years.
- Kept customer retention above 90% by tracking customer history in Excel and keeping consistent, documented follow-up with customers.

Market Research Interviewer

Jan 2021 to May 2021

Elemental Data Collection / Ottawa, ON

- Conducted structured interviews against research protocols and polling scripts, capturing responses accurately to support clean downstream datasets and consistent reporting across projects.
- Improved sample quality by converting 30 to 40% of initial refusals, raising response rates and strengthening the representativeness of project data.
- Maintained accurate records of response outcomes, call attempts, and interview dispositions to support supervisor and analyst review and reliable downstream reporting.

EDUCATION

Bachelor of Science, Biology

Sep 2020 to Dec 2024

University of Ottawa / Ottawa, ON

- Structured data collection and documentation in microbiology coursework (sample handling, protocol adherence, results logging).
- Quantitative and statistical analysis of laboratory datasets in Excel; technical lab reports summarizing methods, results, and limitations.
