

Husam Ahmed

Federal Data Integrity & Compliance | Biometrics & Identity Operations | Secret Clearance Eligible

Ottawa, ON | husamdaifalla01@gmail.com | (647) 685-6908 | linkedin.com/in/husam-ahmed2025

PROFESSIONAL SUMMARY

Federal data-integrity and compliance analyst working across identity, biometric, and privacy compliance domains. Cross-unit experience at IRCC's Operations Support Centre (BOSU biometric operations, CISU privacy reviews, Data Integrity casework) alongside concurrent regulatory analytics at Stelis Environmental Solutions. Builds Power BI dashboards and Excel-based analyses on operational and regulatory datasets, and maintains SOPs, compliance checklists, and regulatory change logs to keep audit-ready documentation current. Bilingual English/Arabic. Eligible for Secret security clearance.

CORE SKILLS

Documentation: SOP Development, Regulatory Documentation, Compliance Checklists, Change Logs, Version Control, Content Management, Knowledge Management, Technical Writing, Briefing Notes.

Operations: Case Management, Data Integrity, Records Management, Data Analysis, Quality Assurance, Audit Readiness, Process Improvement, Workflow Mapping, Escalation Coordination.

Compliance & Policy: IRPA, IRCC Legislation, Regulatory Analysis, Privacy Compliance, KYC, Information-Sharing Controls, Federal Program Delivery.

Tools: GCMS, Microsoft Excel (pivot tables, lookups, formulas), Power BI, SharePoint, Microsoft Teams, Document Management Systems, CRM Platforms.

PROFESSIONAL EXPERIENCE

Program Assistant / Acting Case Processing Agent (CR-04, Acting PM-01)

Aug 2024 to Present

[Immigration, Refugees and Citizenship Canada, Operations Support Centre](#) / Ottawa, ON

- Specialist across three Operations Support Centre units at IRCC: BOSU (biometric operations), CISU (data privacy breach reviews), and DI (data integrity casework), with every decision grounded in the Immigration and Refugee Protection Act (IRPA) and IRCC operational policy.
- Operations coordinator across BOSU and DI, triaging biometric and identity-correction tickets from 60+ overseas Visa Application Centres and Missions plus internal IRCC and federal partners in ARS Remedy IT, generating daily and bi-weekly reports and complex-case summaries for senior management.
- Daily data privacy compliance reviewer of GCMS records bypassed by automation, applying sort, filter, and categorization logic in Excel to surface potential breaches (Canadian/US residents, Permanent Residents, restricted UCIs) for escalation to ATIP and Information Sharing Officers.
- Identity-reconciliation analyst in Data Integrity, comparing 2-5 client profiles in GCMS to verify biographic, biometric, and history fields across passport (PPMI) and immigration (IMM) application streams before executing UCI merges.
- Point of contact for biometric operational concerns: diagnose transmission failures, troubleshoot hardware and software, administer biometric software access (CIBIDS, LDAP Softerra, vSEC), execute biometric and biographic associations and disassociations in GCMS, and onboard new agents.

Water Quality Researcher, Quality Systems

Nov 2023 to Present

[Stelis Environmental Solutions](#) / Ottawa, ON

- Build Power BI heat maps of microbial, chemical, lead, and nitrate exceedances across Canadian and US jurisdictions from public Health Canada, US EPA, and provincial reports to support market-prioritization analysis.
- Validate ColiMinder real-time monitoring (enzymatic β -glucuronidase fluorescence) by comparing outputs against culture-based lab references in Excel and tracking alarm frequency and false-positive rates in pivot tables to inform threshold and sampling-frequency tuning.
- Maintain a recurring Excel summary of pilot data covering sample counts, regulatory exceedances, and method-vs-lab agreement, reviewed by project leads to track pilot progress.
- Maintain a regulatory change log spanning federal and provincial drinking-water rules (Health Canada GCDWQ, Ontario O. Reg. 169/03 and 170/03), logging changes, mapping affected SOPs, and surfacing compliance risks to project leads.
- Author and maintain the team's consolidated SOP and compliance checklist on federal and provincial microbial monitoring rules, used as the primary reference for assessing ColiMinder outputs against lab-based regulatory requirements.

Manager on Duty / Sales Advisor

May 2021 to Aug 2024

Rogers Communications / Ottawa, ON

- Managed day-to-day store operations as Manager on Duty (MOD), serving as the on-floor decision-maker for credit, KYC, and privacy questions and approving transactions only when each compliance step was met.
- Onboarded and trained new hires on KYC procedures, privacy requirements, and documentation standards to maintain consistent compliance across the team and across all shifts.
- Led a team of three over three years, embedding compliance into daily operations, reviewing customer records and transaction documentation for accuracy, and holding the team accountable to internal procedure.
- Maintained client retention above 90% and high CSAT by analyzing CRM customer history in Excel and structuring follow-up workflows that produced an auditable record of each customer interaction.

Market Research Interviewer

Jan 2021 to May 2021

Elemental Data Collection / Ottawa, ON

- Conducted structured interviews against research protocols and polling scripts, capturing responses accurately to support clean downstream datasets and consistent reporting across projects.
- Improved sample quality by converting 30–40% of initial refusals, raising response rates and strengthening the representativeness of project data.
- Applied standardized procedures for respondent selection, structured data entry, and script adherence to maintain consistency and comparability across research projects.
- Maintained accurate records of response outcomes, call attempts, and interview dispositions to support supervisor and analyst review and reliable downstream reporting.

SELF-DIRECTED TECHNICAL DEVELOPMENT

verdict

TypeScript, React, PostgreSQL, Supabase, Docker; AI-assisted build

A governance platform that helps engineering and compliance teams catch policy violations across code repositories and AI provider integrations, flagging risks against regulatory standards (like CAN-SPAM) before they reach production.

- Catches violations like missing unsubscribe paths on commercial email code or AI-provider use cases that conflict with the provider's terms, blocking the merge at the pull-request gate before non-compliant code ships.
- A change in the outside world re-triggers compliance checks: when an AI vendor updates its terms of service, verdict re-scans every repo that depends on that vendor, flagging code that became non-compliant without anyone touching it.

curious-brain

Python, Anthropic API, Claude Code; AI-assisted build

An applied neuroscience system extending Claude Code with persistent memory, autonomous task execution, and nightly consolidation pipelines modeled on biological mechanisms.

- Layered on Claude Code as a persistent memory and context-injection system. Typed records (semantic, episodic, procedural) with salience scoring, decay rates, and Hebbian-style connections feed an append-only event log; every new session opens with active project state, prior decisions, and synthesized overnight research already loaded.
- Project-management discipline embedded as automated cycles: per-venture sprints, OKRs, and initiatives advancing via commit tags, daily standups, afternoon reviews, weekly retrospectives, and 48-hour forward-motion alerts. Decisions route through layered reasoning: input classification by stakes, multi-agent deliberation, and tiered execution gates that escalate risk for human approval.

EDUCATION

Bachelor of Science, Biology

Sep 2020 to Dec 2024

University of Ottawa / Ottawa, ON

Google Data Analytics Professional Certificate

In progress
