

Husam Ahmed

Operations & Compliance | Federal Government Experience | Eligible for Security Clearance

Ottawa, ON | husamdaifalla01@gmail.com | (647) 685-6908

PROFESSIONAL SUMMARY

IRCC Operations Support Centre Program Assistant with hands-on experience triaging operational tickets and resolving issues across federal biometric and case-management platforms. Outside of work, self-directed builder of personal projects with AI as a coding partner, gaining practical exposure to modern development tooling and end-to-end deployment workflows. Working through the Google Data Analytics Professional Certificate to strengthen data fundamentals. Bringing federal operational depth and a builder's mindset to platform support and IT operations roles in government.

TECHNICAL SKILLS

Government operations and enterprise systems: ARS Remedy (BMC ITSM ticketing), GCMS, BioSP, CIBIDS. Operational use, ticket triage, and troubleshooting in a BOSU support context. Supporting tools: Microsoft Office (Word, Excel) for structured reports, compliance trackers, and comparison tables; documented communication in secure environments.

Personal AI-assisted projects: GitHub Actions, Docker, Docker Compose, Python, TypeScript, Node.js, Next.js, REST APIs, Supabase/PostgreSQL, SQL, dotenv-style config, Anthropic SDK, Vercel, Vitest. Used while building personal projects with AI as a coding collaborator.

PROFESSIONAL EXPERIENCE

Program Assistant / Acting Case Processing Agent · CR-04 (substantive) · PM-01 (acting) Aug 2024 to Present
[Immigration, Refugees and Citizenship Canada, Operations Support Centre](#) / Ottawa, ON

- Triage ARS Remedy tickets for biometric system failures from 60+ Visa Application Centres and Missions worldwide, updating ticket status, documenting resolution steps, and escalating to the appropriate IT team when issues exceed first-line scope.
- Applies work-item triage and lifecycle management practices consistent with enterprise ITSM environments, including status tracking, escalation routing, and resolution documentation across a high-volume daily ticket queue.
- Investigates BioSP (IRCC's biometric service platform) failures by tracing errors from submission through transmission routing and interpreting responses from downstream IRCC partner systems to identify the correct resolution path.
- Supports GCMS users by investigating and resolving identity discrepancies, including UCI merges, biometric re-associations, and unlinked identifier issues that would otherwise block application processing.
- Processes access requests, permission changes, and urgent access failures for biometric enrolment systems across 60+ global offices, documenting each action for audit traceability across time zones.
- As an acting PM-01 Case Processing Agent, brings end-to-end GCMS visibility spanning both the BOSU support layer and the end-user decision layer, directly applicable to triaging GCMS platform issues reported by operational users.

Water Quality Researcher, Quality Systems

Nov 2023 to Present

[Stelis Environmental Solutions](#) / Ottawa, ON

- Consolidated federal and provincial rules on microbial water monitoring into a single SOP reference covering sampling, reporting, verification, and documentation, adopted by the team for day-to-day compliance work.
- Authored a compliance checklist derived from regulatory and guidance text that serves as the team's primary reference for assessing whether real-time monitoring outputs satisfy requirements currently covered by lab-based testing.
- Maintain a regulatory change log and action tracker, logging emerging requirements, identifying affected procedures, and coordinating SOP revisions to keep documentation current and audit-ready.
- Analyze pilot results in Excel and document findings as comparison tables, briefs, and meeting notes laying out tradeoffs in speed, verification, and regulatory acceptance to support project-lead decisions.
- Mapped the end-to-end monitoring workflow and documented handoffs and delays affecting response time, presenting findings to subject-matter experts and project leads to inform process improvements.

Manager on Duty / Sales Advisor

May 2021 to Aug 2024

[Rogers Communications](#) / Ottawa, ON

- Served as first-line support for customers with account and service issues, triaging problems, identifying likely causes, and escalating to carrier technical teams when cases exceeded store-level resolution.
- Supported customers through plan migrations, account integrity failures, SIM and device provisioning errors, and billing discrepancies, learning to resolve or escalate quickly under time pressure.
- Onboarded and trained new hires on service procedures, CRM usage, and documentation standards, maintaining consistent first-line support quality across all shifts over three years.
- Documented customer interactions, resolution outcomes, and escalation records in CRM systems, building structured recordkeeping habits across a team of three and a high daily volume of cases.

Market Research Interviewer

Jan 2021 to May 2021

[Elemental Data Collection](#) / Ottawa, ON

- Conducted structured interviews against research protocols and polling scripts, capturing responses accurately to support clean downstream datasets and consistent reporting across projects.
- Improved sample quality by converting 30 to 40% of initial refusals, raising response rates and strengthening the representativeness of project data.
- Applied standardized procedures for respondent selection, structured data entry, and script adherence to maintain consistency and comparability across research projects.
- Maintained accurate records of response outcomes, call attempts, and interview dispositions to support supervisor and analyst review and reliable downstream reporting.

SELF-DIRECTED TECHNICAL DEVELOPMENT

FN3 + fn3-hive (Docker, GitHub Actions, TypeScript, Next.js, Supabase). Multi-service Docker Compose deployment with a GitHub Actions CI/CD pipeline, running across several vertical sites on Vercel. Operations managed by a companion TypeScript daemon (fn3-hive) exposing a REST API, maintaining SQLite state, and routing incident escalations through Discord when automated handling falls outside defined scope. Built with AI as a coding partner throughout.

Datamind (PostgreSQL, REST APIs, Next.js, Supabase, Anthropic SDK). File ingestion and processing pipeline deployed to Vercel, backed by PostgreSQL storage with REST API data intake, schema extraction, and structured output generation. Integrated the Anthropic SDK to automate analytical workflows on ingested datasets. Built with AI as a coding partner throughout.

EDUCATION

Bachelor of Science, Biology

Sep 2020 to Dec 2024

[University of Ottawa](#) / Ottawa, ON

- Applied structured data-collection and documentation practices in microbiology coursework, including sample handling, protocol adherence, and results logging.
- Performed quantitative and statistical analysis of laboratory datasets in Excel and produced clear technical lab reports summarizing methods, results, and limitations.

Google Data Analytics Professional Certificate

In progress

[Coursera](#)

- Modules completed: Excel and spreadsheets. Remaining coursework focused on SQL and data visualization.
