Re: Application to PM-02 / PM-03 and AS program streams, Various Positions Inventory

I am applying to the PM-02/PM-03 program streams and AS administrative streams of this inventory. I work at IRCC's Operations Support Centre, where I resolve identity discrepancies in GCMS, triage the Data Integrity unit's national intake of identity-correction requests, and apply IRPA to information-sharing decisions every working day. Border integrity runs on the same system, the same statute, and the same discipline. That continuity is why I am applying.

On the program-delivery essentials: I execute master-record corrections (UCI merges, biometric associations and disassociations) on national client data, support biometric operations for staff at over 60 Visa Application Centres and Missions abroad, and confirm citizenship status against naturalization and revocation records, citing documentation for downstream officers. Every action is logged and every decision is documented, because in this work an undocumented decision is a liability.

On the administrative and reporting side: in a concurrent research role I author the team's consolidated SOP and compliance checklist, maintain a regulatory change log, and write the briefing notes that go to senior management. I also run Excel pivot analyses and build Power BI dashboards on large operational datasets.

Assets I bring beyond the essentials: an active Reliability Status, native English and Arabic, working knowledge of French (not yet SLE tested, so I am applying to English-essential streams), and current GCMS fluency. For accuracy: my substantive classification is CR-04, with an acting PM-01 at IRCC. I am in the NCR, available with standard internal-mobility timelines, and open to Secret-level screening.

Sincerely,

Husam Ahmed
