

Husam Ahmed

Identity Verification & Compliance Operations • Federal Government Experience • Active Reliability Status

Ottawa, ON · husamdaifalla01@gmail.com · (647) 685-6908 · linkedin.com/in/husamahmedca

PROFESSIONAL SUMMARY

Identity and verification specialist working a national investigation queue. At IRCC I investigate identity discrepancies in GCMS, weighing biographic, biometric, and document evidence to decide whether records belong to the same person, with a documented rationale behind every correction: the same judgment application-fraud review runs on. I examine passports and travel documents directly and know the tactics applicants use to trick identity systems. Three years at Rogers making front-line credit, KYC, and fraud-prevention decisions on credit-check results. False-positive analysis from a concurrent research role at Stelis. Active Reliability Status. Currently completing the Google Data Analytics Professional Certificate (Coursera).

CORE SKILLS

Operations · Identity Verification, Entity Resolution, Case Triage, Data Integrity, Data Analysis, Quality Assurance, Case Management

Compliance & Policy · KYC, Privacy Compliance, Breach Handling, Information-Sharing Controls, IRPA

Documentation · SOP Development, Briefing Notes, Technical Writing, Change Logs

Tools · GCMS, Microsoft Excel (pivot tables, lookups, formulas), Power BI, SharePoint, Microsoft Teams

PROFESSIONAL EXPERIENCE

Program Assistant / Acting Case Processing Agent (CR-04, acting PM-01)

Aug 2024 to Present

Immigration, Refugees and Citizenship Canada, Operations Support Centre / Ottawa, ON (Held concurrently with the Stelis role below from Aug 2024 to Jul 2025.)

- Resolve probabilistic identity matches in IRCC's Global Case Management System (GCMS) by cross-referencing biographic, biometric, and travel document evidence across two or more associated client records, including multi-record household cases, then commit master-record corrections (UCI merges, biometric associations and disassociations, profile relinking) to restore case integrity for federal applicants.
- Perform in-depth identity analysis on client files, examining passports and travel documents directly and drawing on close familiarity with the fraudulent tactics applicants use to try to defeat identity controls.
- Triage the central Data Integrity unit's national intake of status checks and household identity-correction requests routed from offices across the federal department, supporting both PPMI and IMM applicants, prioritizing against case urgency and team capacity.
- Run pivot analyses in Excel and reporting queries in GCMS across large case datasets to confirm application statuses, surface anomalies, and flag potential information-sharing breaches for controlled handling.
- Confirm citizenship status by reviewing naturalization records, certificate issuance, and grant or revocation history in IRCC systems, returning verified status with supporting documentation cited for downstream officers and partner program requests.

Water Quality Researcher

Nov 2023 to Jul 2025

Stelis Environmental Solutions / Ottawa, ON (Held concurrently with the IRCC role above (Aug 2024 to Jul 2025).)

- Compare real-time ColiMinder readings against culture-based lab results in Excel pivot tables, calculating percent agreement and false-positive rates across pilot sites to quantify how closely the real-time method tracks the lab benchmark.
- Write the briefing notes and comparison tables that go to senior management, laying out speed, verification, documentation, and regulatory-acceptance tradeoffs between real-time and lab-based monitoring.
- Combine and clean public drinking-water and wastewater monitoring data from Health Canada, the US EPA, and provincial reports, standardizing inconsistent reporting formats, then build cross-jurisdictional Power BI dashboards, including exceedance heat maps, that drive the team's market prioritization.
- Track regulatory changes to drinking-water rules in a running change log, update the SOP and compliance checklist as rules evolve, and surface compliance risks to project leads.
- Map the end-to-end monitoring workflow to flag where handoffs slow things down, documenting lab turnaround times against the response windows required to contain microbial contamination.

Manager on Duty / Sales Advisor

May 2021 to Aug 2024

Rogers Communications / Ottawa, ON

- Acted as on-floor compliance authority for credit, KYC, and privacy decisions, reviewing customer documentation and credit-check results before any transaction closed: the store's front line against subscription and identity fraud.
- Onboarded and trained new hires on KYC procedures, privacy requirements, and documentation standards, maintaining consistent compliance across shifts; led a team of three over three years.

- Ran the store floor as Manager on Duty, owning opening and closing procedures, cash and inventory controls, and daily targets, and serving as the escalation point for both staff and customers across the shift.
- Kept customer retention above 90% by tracking customer history in Excel and keeping consistent, documented follow-up with customers.

Market Research Interviewer

Jan 2021 to May 2021

[Elemental Data Collection](#) / Ottawa, ON

- Conducted structured interviews against research protocols and polling scripts, capturing responses accurately to support clean downstream datasets and consistent reporting across projects.
- Improved sample quality by converting 30 to 40% of initial refusals, raising response rates and strengthening the representativeness of project data.
- Maintained accurate records of response outcomes, call attempts, and interview dispositions to support supervisor and analyst review and reliable downstream reporting.

EDUCATION

Bachelor of Science, Biology

Sep 2020 to Dec 2024

[University of Ottawa](#) / Ottawa, ON

- Structured data collection and documentation in microbiology coursework (sample handling, protocol adherence, results logging).
- Quantitative and statistical analysis of laboratory datasets in Excel; technical lab reports summarizing methods, results, and limitations.
